

These simple pieces of advice in the post will help you simplify the [spring cleaning procedure](#), make it enjoyable, and use our spring cleaning hacks on your own in 2025!

Spring is a perfect time to get rid of useless stuff and use spring cleaning hacks 2025 from Luxury Cleaning NY. To do this, you need to be in a good mood and know a few small tricks.

[Luxury Cleaning NY](#) has discovered several **spring cleaning hacks and secrets** that will help you make fresh spring cleaning easy and enjoyable. Also, this process will be safe for your health, since the supply you need for the cleaning is green and eco-friendly. Moreover, you will be able to find the majority of the things from our spring cleaning checklist at home or buy in the stores at a low price.

Spring Cleaning Checklist PDF by [Luxury Cleaning NY](#):

### **1. Kitchen Cleaning Strategies: Clean the microwave first**

Just put in the oven a cup of water with baking soda and wait until it boils. This procedure eliminates odors and takes less effort to get rid of the dirt that sticks to the walls of the oven. You can also use vinegar or lemon juice instead of soda.

Give your kitchen a fresh spring boost with these simple tips. Start by deep cleaning your appliances:

- wash your fridge using a stainless steel cleaner and make your oven shine with distilled white vinegar and a lemon squeeze.
- Cutting boards are not to be forgotten—scrub them thoroughly with a scouring pumice stone if they are dirty
- for high-touch areas like cabinet handles, stove gap covers, and countertops (quartz, granite, or marble),
- a microfiber cloth with a good cleaner does the trick.

- Finally, clean up your pantry to maintain your space tidy and usable. These recommendations not only ensure a clean kitchen but also create a healthier environment for your daily cooking escapades.
  
- 2. Wash windows when it's not sunny**

Wait for a cloudy day and start cleaning your windows from the dark side of the apartment. The thing is that the sunlight can dry detergents earlier than you were expecting it. That's why you won't have enough time to wash it so that the detergent can leave spots and stains.

- 3. Dust apartments properly**
- And the thing is absolutely different from dust. Wait for a sunny day when the dust will be clearly visible.
- When dusting the apartment, move around the room, starting from the highest points and coming down to the floor. So that dust does not rise up again and accumulate on the already clean surfaces.

## **Dust and Dirt Removal Lifehacks**

Keep your home fresh this spring by tackling every dusty corner.

- Start by cleaning blinds with a dry microfiber cloth or a dedicated blind duster to capture dust on each slat.
- For ceiling fans, try an extendable duster or slide a pillowcase over the blades to trap and remove debris without spreading it around.
- Don't forget your baseboards and walls—wipe them down with a damp, lint-free cloth for a thorough clean
  
- 4. Clean animal hair**

It's not an easy job to remove your pets' hair from upholstered furniture. If you want to make fewer efforts, you will need rubber gloves. Just put them on, wet them, and start collecting animal hair.

#### **5. Stainless steel surfaces cleaning**

If you want your stainless steel surfaces to shine, just mix one teaspoon of dishwashing liquid and a quarter cup of hot water. Wipe the surface with this solution, rinse it with clean, warm water, and immediately wipe the water off.

#### **6. Remove the dents on the carpet**

You will need a steam iron for that. Direct the steam flow to dents. Repeat this procedure several times. You can put some pieces of ice on these areas of the carpet. When they melt, you need to "comb" the rug in the right direction. Water makes the fabric return to its original shape.

#### **7. Remove the stains from the cutting board**

If you think that the stains from vegetables on the board are eternal, this is not true. Rub the surface of the board with lemon juice, then rinse it with salt or with baking soda.

#### **8. Freshen the sink**

In order to avoid some unpleasant odor, throw several lemon peels into the drain hole and rinse it with cold water. Professional cleaners use this technique when performing green eco cleaning services.

#### **9. Knife rack cleaning**

Probably, you have never cleaned a large knife rack because the holes for knives are very narrow and inconvenient. You will quickly deal with it if you use a hairdryer to remove food remnants that could remain in the empty rack from the knives.

#### **10. Ventilation grate cleaning**

The best way to clean ventilation grates is by using some brushes with soft bristles. Air filters may need washing, but in this case, it is better to read the instructions from the device before independent cleaning.

#### **11. Make your bathroom shine**

Every time we do spring cleaning in the house, we leave the bathroom for last. Because you know that you will need to clean the bathroom, sink, toilet, and mirror. We buy all the necessary chemicals and detergents in household stores to clean it. In turn, cleaning products can corrode the enamel of plumbing. But you can resort to some other ways to clean the bathroom safely and perfectly on your own. To make tub white and shiny and eliminate dirt and bacteria, you can prepare the following solution. Dilute a half cup of vinegar, one cup of rubbing alcohol, and a quarter cup of baking soda in 4 liters of warm water. Put this mixture on the surface of the bath and rinse it with cold water after 15 minutes.

#### **12. Shiny mirror**

The mirror in the bathroom always suffers from the splashes when we wash face and brush teeth. It will be bright as a brand-new one if you use black tea. It's a straightforward and efficient method. Just brew a strong tea and wipe the mirror with it using a clean cloth.

#### **13. Shower nozzle cleaning**

Shower nozzle often suffers from the hard water, and later the water flows not in the right direction. In order not to change the shower nozzle, you can do the following thing. Fill in a plastic bag with the vinegar and put the shower nozzle into it. Fix the spout and leave it overnight. In the morning, rinse it with cold water. That's how you can quickly fix this inconvenience.

#### **14. An easy tip on how to clean a toilet brush**

It is also necessary to wash and clean a toilet brush. Pour half cup of baking soda, two tablespoons of salt, a quarter cup of vinegar, detergent concentrate, and boiling water into some unnecessary container. Leave the toilet brush in this solution for one hour. Then rinse it, and the brush will be like new again.

#### **15. Bathroom curtain fixing**

Sometimes you can barely close the shower curtain. The solution is simple: grease the stick, to which the curtain is fixed, with vaseline.

#### **#16 — Organizing and Decluttering**

- Start with sorting boxes: one for donations, one for garage sale treasures, and one for discardable clutter.
- Redo your closet with room-by-room cleaning advice, shedding outdated items while keeping seasonal essentials.
- Customize your decluttering strategy to your cleaning personality, whether you're a chore procrastinator or a power session organizer.

### **17. Outdoor and Exterior Cleaning**

- Start by cleaning your patio and deck furniture using a mild cleaning, dusting away dirt and grime, and inspecting for rust or wear.

- Touch up exterior paint to keep your home appearing spotless and inviting.
- Don't neglect your gutters and downspouts—clear out obstructions to enable unobstructed water flow and prevent damage.
- Also, clean sliding door tracks and sweep your driveway, sidewalks, and porch for a complete exterior refresh. With these practical tips, you'll create a welcoming outdoor haven that's perfect for enjoying the season.

#### **#18 — Odor Removal Techniques**

- For gym clothes, wash your cotton-poly blend workout gear with a synthetic detergent and hot, soapy water, and air dry them for a fresh finish.
- Fight against trash cans by scrubbing them with an all-purpose cleaner and disinfectant, and consider using a plastic bag liner to catch odors.
- For sneakers, shake baking soda inside and leave overnight and shake out. These simple tricks make your NYC home smell as clean as the season.

#### **Bonus Lifhack: Electronic and Appliance Maintenance**

- Start with your cellphone: remove its case and clean it using warm water and mild dish soap.
- Don't overlook wiping down TV remotes, doorknobs, and light switch plates using disinfectant wipes. For coffee makers, run a cycle of white vinegar to remove deposits and enjoy a fresh cup.
- Regular washing machine cleaning—a fast clean cycle—prevents odors and keeps it running efficiently

Now you know some secrets of spring cleaning service and cleaning won't be "mission impossible" for you anymore!
